

# VB-105 *Cleaner/Rust Inhibitor*

## PRODUCT DESCRIPTION

An alkaline liquid compound uniquely formulated to remove soils rapidly, keep media free cutting while lowering cycle time. Contains an extremely effective rust inhibitor for protection of ferrous metal parts during processing cycle.

- Cleaning – excellent for removing water solubles to heavy drawing compounds
- Inhibiting – Prevents corrosion during processing as well as 90 days indoor protection. Also recommended as a post dip for long term protection.
- Can be used with dispensing systems or close drain systems.
- Low Foam – Though high in cleaning quality, VB-105 is designed to produce a minimum amount of foam that would lengthen cycle times.

## USAGE & DILUTION RECOMMENDATIONS

Recommended usage is 1% - 2% solution. However, this may vary according to local water hardness and actual soil conditions.

## HANDLING & STORAGE

This product does not pose any fire hazards. Use good industrial hygiene practices such as wearing chemical safety goggles, rubber gloves, and an impermeable apron as necessary to prevent personal contact. If eye contact occurs, flush with plenty of water for at least 15 minutes and consult a physician. In case of skin contact, wash with soap and water, removing contaminated clothing and shoes. Keep the container tightly closed when not in use. Store product in the original container between 45° and 85° F.

*Refer to our Material Safety Data Sheet for additional information.*
